

# MEA PUSH PROVISIONING

Mea Push Provisioning allows consumers to easily add cards to any supported wallets - including Apple Pay and Google Pay - in-app with the click of a button.

## Key Features

Easy to implement

Multiple schemes and wallet support via a single SDK

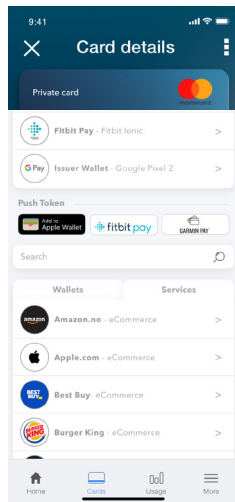

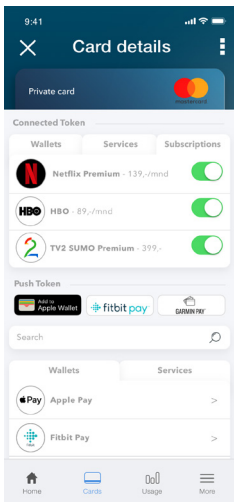

Convenient and secure

## Why Mea Push Provisioning?

Mea Push Provisioning facilitates all wallets through a single integration and enables consumers to push their selected cards in-app or online. In addition, it:

- ▶ Supports all major push provisioning solutions including Apple Pay, Google Pay, Mastercard Token Connect and Visa Network Hub Push Provisioning.
- ▶ Increases the number of users provisioning tokens to digital wallets, compared to manual onboarding, by approximately 2 to 3 times.
- ▶ Provides a ready-built SDK and backend services, minimizing development investment required from issuers.

## Supported Schemes

VISA

## Our Products

- Mea Token Platform - I-TSP
- Mea Token Platform for OEM Pay
- Mea Token Platform for Issuer Pay
- Mea Push Provisioning
- Mea Token Control
