

MEA TOKEN CONTROL

Mea Token Control enables consumers to easily keep track of and manage all their tokenized cards directly from one central hub. Providing customers with complete token control, issuers can enhance their offering and drive engagement, both in-app and online.

Key Features

Ready-to-implement
SDKs and APIs

Multi-scheme support
through one integration

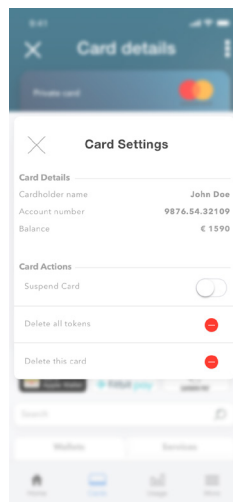

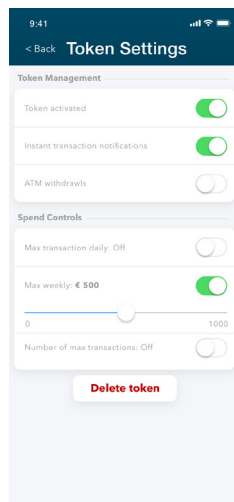

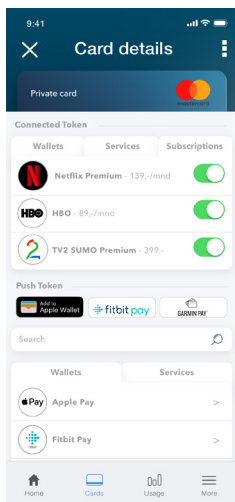

Available on Android,
iOS and Web

Why Mea Token Control?

Mea Token Control drives customer engagement and enriches the user experience of both banking apps and websites by:

- ▶ Providing a central hub for complete token control, allowing customers to easily track and manage their tokenized cards across different wallets and payment schemes.
- ▶ Enabling customers to readily suspend, unsuspend and delete tokenized cards directly from their mobile app or website.
- ▶ Offering a self-service solution which directs more traffic towards Issuer apps and away from customer services.
- ▶ Reducing time-to-market.

Supported Schemes

Our Products

- Mea Token Platform - I-TSP
- Mea Token Platform for OEM Pay
- Mea Token Platform for Issuer Pay
- Mea Push Provisioning
