

# MEA PUSH PROVISIONING

Mea Push Provisioning allows consumers to easily add cards to any digital wallets – such as Apple Pay, Google Pay and eCommerce merchants – in-app or web with the click of a button.

## Key Features

**Convenient and secure**  
in-app provisioning of cards

**Multiple schemes and wallets supported**  
through a single integration

**Saving integration time and effort**  
using our code libraries (SDKs)

## Why Mea Push Provisioning?

Mea Push Provisioning facilitates digital provisioning to all wallets through a single solution and enables consumers to push their selected cards directly from the issuer's app or from the web. In addition, it:

- ▶ Supports all major push provisioning solutions including Apple Pay, Google Pay, Samsung Pay, Mastercard Token Connect, Visa Card Enrolment Hub, and more
- ▶ 3 times higher rate of number of users provisioning cards to digital wallets, compared to manual onboarding
- ▶ Provides a ready-built SDK and backend services, minimizing development investment required from issuers

## Supported Schemes

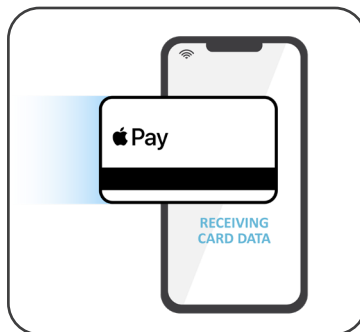

**VISA**
